You name it, we can hold it

Elevate your food presentation

At Fri-Jado, **we are committed to making your food look and taste irresistible, helping you boost your sales.** By listening to our customers' specific needs, we've developed the MCC range of hot, cold and ambient displays for packaged and unpackaged food-to-go. The result? A solution tailored to meet all your requirements.

MCC Ambient

Our ambient display comes with 3-levels. Available in widths of 600, 900, or 1200 mm, self-serve or serve-over. On a base or as drop-in. Unlimited combination possibilities with other MCC and DC models, hot, cold or ambient.

Purchasing an ambient food display offers several advantages, particularly for businesses aiming to showcase non-refrigerated food items attractively and efficiently. Fri-Jado's MCC Ambient displays exemplify these benefits:

Outstanding presentation

Fri-Jado's ambient displays are designed for maximum transparency, ensuring your food items are visible from all sides. This 360-degree visibility enhances product appeal and can boost impulse purchases.

Space-saving design

Despite their compact footprint, these displays offer a large capacity, making them ideal for establishments with limited space.

Versatility and modular integration

The MCC range allows for seamless integration with hot and cold displays, all sharing the same design and dimensions. This modularity enables you to create a cohesive and flexible food display setup tailored to your specific needs.

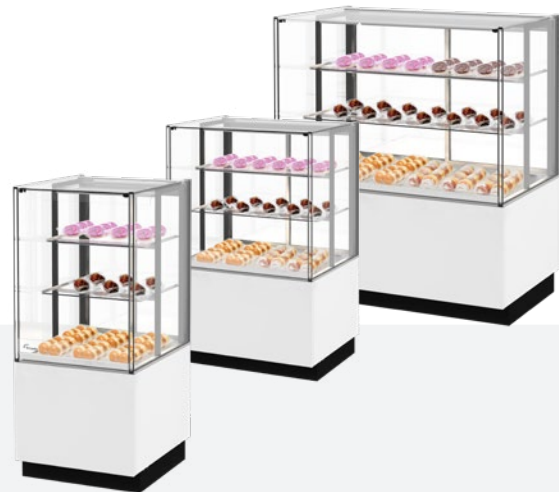

Design

Transparent design	Up to 75% more food visibility* compared to other display solutions on the market. Seeing is buying! *According to global standards: TDA ISO 23953
Mirrored glass sliding doors on the operator side	Mirrored glass sliding doors enhance food visibility by creating a larger visual presentation area while saving space
Slim transparent shelves with adjustable height and angle	Gives you the opportunity to create a even more attractive, versatile, and customer-friendly display environment, leading to improved product visibility and potentially increased sales
Base in any RAL colour (standard RAL 9010), available in different widths	Designed as a standalone unit on a base, this food display saves valuable counter space while providing a sleek, integrated look. Available in 600, 900 and 1200 mm wide in 3-level
Drop-in model, available in different widths	Designed to be installed directly into countertops or serving surfaces, saving valuable counter space and providing a integrated look. Available in 600, 900 and 1200 mm wide in 3-level
Modular design matching with other MCC Hot, Cold and Ambient displays and with Fri-Jado's Hot and Cold Deli Counters	Create a complete line-up of hot, cold and/or ambient food displays in a uniform look and feel, to suit any food sales concept
LED lighting with natural colour reproduction on each shelf	LED lighting provides bright and even illumination across all shelves, making products more visible and attractive to your customers. LED has minimal heat emission, which helps in maintaining the optimal temperature within the display and preserving food quality
